

## RPE an Italian story

Founded in 1972 by the vision of our founder Mr. Giuliano Ravazzani, RPE SRL is today a global leader in the development and manufacturing of Solenoid Valves, Pressure Regulators, Filters and Flow Meters for many industries worldwide.

RPE products are proudly made 100% in Italy, with every component designed and manufactured in our modern facilities located in Carbonate (Como), Italy.

Our Company is continuously working in the development of new products and creative solutions for a wide variety of applications, including Professional Food Equipment, Coffee & Tea Machines, Beverage & Filtration Systems, Medical & Dental Solutions, Sanitary Applications, Commercial Cleaning Equipment, Marine Applications, Irrigation Systems, Steam Machines, Household Appliances and Hot Tubs & Spas.

# LEADER IN FLUID MANAGEMENT CONTROL

40' + years' experience in the industry  
a standard of excellence in the international market for solenoid valves

**Discover RPE by Application:**

**Professional Food Equipment:** RPE's Solenoid Valves have been developed and are used in Combi-Steam Ovens, Ice & Vending Machines, Steamers and Ware-Washing Equipment.

**Coffee & Tea Machines:** Our Solenoid Valves, Flow Meters, Pressure Regulators and Filters are used in Espresso Machines, Coffee & Tea Brewers, Nitro Coffee and Kombucha Tea Dispensers.

**Beverage & Filtration Systems:** The Solenoid Valves, designed for Water & Beverage Dispensers and Vending Machines can have 2 or 3 Inlets. As they have been specifically designed for handling two or more different types of liquids such as sparkling and tap water, Cold and Ambient temperature water.

These Valves are also used in Filtration and Reverse Osmosis systems, providing flexibility and reduced dimensions for small equipment units.

**Medical & Dental Solutions:** Our entire product range, from an Inlet valve to fluid control components, such as our Flow Meters, Pressure Regulators and Filters are a perfect fit for Lab-

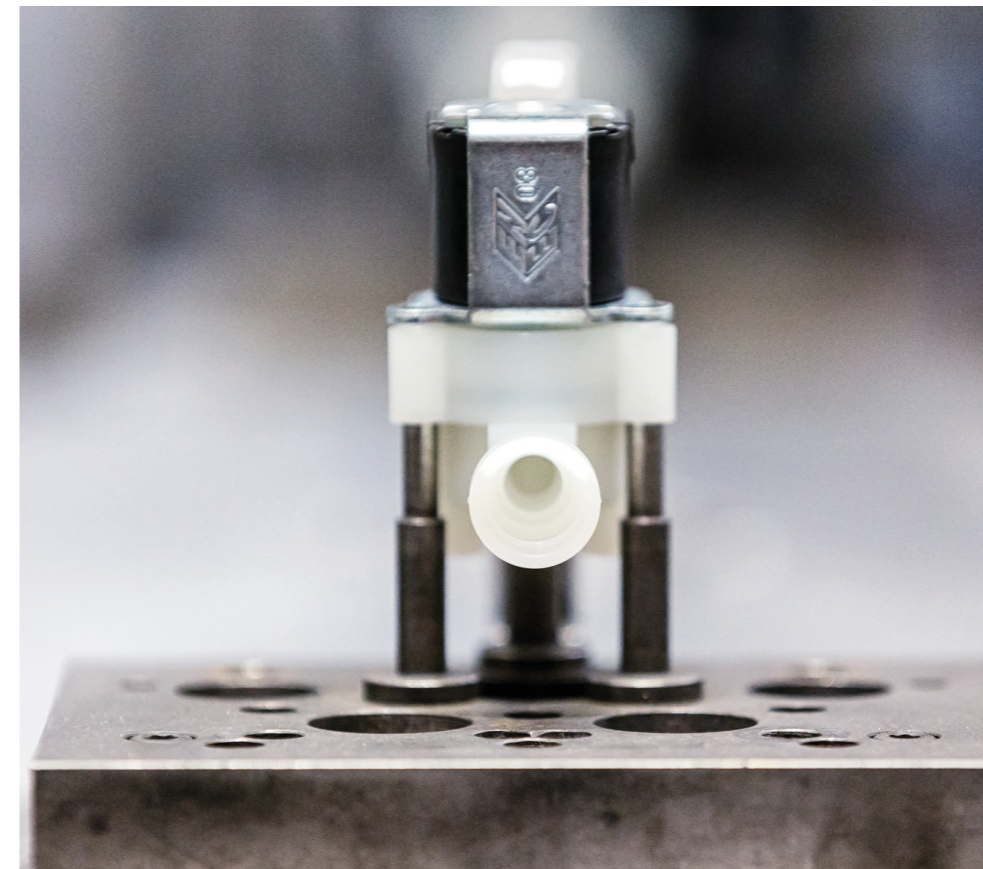

oratory Equipment, Dental Chairs, Professional Sterilization Machines, Bedpan Washers and Disinfecting Equipment.

**Sanitary Applications:** Our R Mini & Micro Series Solenoid Valves are widely used in Electronic Faucets & Flush Valves and our 800 Series has showed great results and extraordinary features on Automatic Soap Dispensers. All of these Valves are characterized by their reduced size, extreme performance and resistance.

The use of high-temperature polymers ensures strong quality life under the complex and extreme conditions found in Sanitary applications.

**Commercial Cleaning Equipment:** Customized solutions for Floor Scrubbers, Sweeper-Scrubbers, Carpet Cleaners & Extractors, Floor Machines for the Professional and DIY Cleaning Industry.

**Marine applications:** RPE's unique assortment and broad configurations make our products a reliable and essential solution to supply water in boat docks and marinas, as well as for sanitary applications in boats, cruise ships and working vessels.

**Irrigation Systems:** Our Second and Third Series Solenoid Valves offer a wide range of sizes suitable for Commercial or Residential Systems, Sport Facilities, Golf Courses, Agricultural Applications, as well as for smaller terraces and home gardens.

**Steam Machines:** Our Steam Series Valves have been designed to withstand temperatures up to 140° C, perfect for Commercial Irons and Residential Hot Water Boilers. These Valves are medium separated, designed to endure the presence of limestone through a dry environment core that provides long service life.
